Sir:

STATEMENT

In accordance with Applicants' duty of candor toward the Office, Applicants previously advised the Examiner of the existence of U.S. Patent Application 10/634,497, filed August 5, 2003, entitled GROOVED DECKING BOARD. An office action was mailed in the '497 application on October 6, 2006, in which several claims were rejected as being anticipated by, or obvious in view of one or more references. A copy of that action is enclosed.

Respectfully submitted,

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/21/06 has been entered. Claims 1-4 and 6-20 are pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4, 7, 10, 11 and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,394,667 to Nystrom.

See figure 12. As to claim 11 elements 40 are considered the joists. As to claims 10 and 16, the process in which an article is produced need not be met in an article claims as long as all of the claimed structure is provided in the prior art.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3635

5. Claims 2, 3, 6, 8-10 and 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 5,394,667 to Nystrom.

Nystrom provides each of the elements of these claim in figure 12 except for specifying the dimensional limitation and that the board 50 is made from a composite material of cellulosic fibers and plastic.

The examiner takes Official Notice that making boards of conventional lumber type dimensions from a composite material of cellulosic fibers and plastic is well known and that it would have been obvious at the time of the invention to one having ordinary skill in the art that the boards of Nystrom could have been out of such material. It would have been obvious to make the boards out of a composite for environmental reason and because such boards are less susceptible to decay and rot.

Each of the recited dimensional limitations claimed are viewed as choices of design which would have been obvious at time of the invention to one having ordinary skill in the art particularly in view of the fact both the instant invention and Nystrom relate to decking boards and Nystrom recites that the features of his invention are applied to conventionally dimension lumber products which have a thickness which falls within the 0.5 to 2 inches. Figure 12 would suggest that the upper lip extends at least about 20% further than the lower lip and a slight spacing would be desirable to allow for water to run off and thus not accumulate upon the surface of the deck.

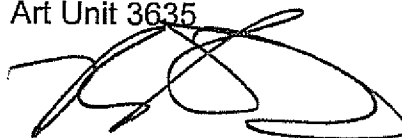

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6840. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Naoko Slack can be reached on 571-272-6848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
